

CLEAN COPY OF THE AMENDED AND NEW CLAIMS

- Sub C1
- A1
1. (Amended) A composition for enhancing the action of Vitamin A on the cellular activity of an individual, comprising a plurality of dispersed microspheres, said plurality of microspheres comprising Vitamin A and an antioxidant inserted into a first group of microspheres, and Vitamin C inserted into a second group of microspheres; wherein said microspheres are made of biologically active material.
 2. (Amended) The composition according to claim 1, wherein Vitamin C is present at a concentration of about 0.02% by weight, and Vitamin A is present at a concentration of about 0.009% to 0.02% by weight, based on the total weight of the composition.
 3. (Amended) The composition according to claim 2, wherein Vitamin C is contained in the second group of microspheres at a concentration of 0.02%.
 4. (Amended) The composition according to claim 3, wherein the first group of microspheres contains Vitamin A at an average concentration of about 0.014% by weight, based on the total weight of the composition.
 5. (Amended) The composition according to claim 4, wherein the first group of microspheres contains Vitamin A at an average concentration of 0.014% and Vitamin E at an average concentration of 0.0005% by weight, and cosmetic compounds selected from the group consisting of skin structures, micronutrients of the skin, sensorial agents, solar protection factors,

PC1
emulsifiers, thickeners, sequestrants, antioxidants, fragrances, conservants, water and mixtures thereof.

6. (Amended) The composition according to claim 1, wherein the Vitamin C to Vitamin A weight ratio ranges from about 1:1 to about 10:1.

Please add the following new claims:

PC1
7. (New) The composition according to claim 1, wherein the antioxidant is Vitamin E.

A2
8. (New) The composition according to claim 5, wherein the skin structures are squalan and sphingolipide complexes.

9. (New) The composition according to claim 5, wherein the micronutrients of the skin is seaweed extract.

10. (New) The composition according to claim 5, wherein the sensorial agents are selected from group consisting of moisteners, emollients, and silicones.

11. (New) The composition according to claim 10, wherein the moisteners are selected from the group consisting of glycerin, hydroxy prolisilan, and combinations thereof.

12. (New) The composition according to claim 10, wherein the emollients are selected from the group consisting of butylene glycol, cethyl lactate, and combinations thereof.

Sub C1
13. (New) The composition according to claim 10, wherein the silicone is cyclomethicone.

14. (New) The composition according to claim 5, wherein the solar protection factors are selected from the group consisting of butyl methoxydibenzoyl methane, 3-(4-methylbenzylidene) camphor, and combinations thereof.

A2 cont
15. (New) The composition according to claim 5, wherein the emulsifiers are selected from the group consisting of acrylates/C10-30 alkyl acrylate crosspolymer associated to trietanolamin, soybean lecithin, and combinations thereof.

16. (New) The composition according to claim 5, wherein the thickener is xanthan gum.

Sub B1
17. (New) The composition according to claim 5, wherein the sequestrant is EDTA.

18. (New) The composition according to claim 5, wherein the antioxidants are selected from the group consisting of BHT, dl- α -tocopherol, and combinations thereof.
